

Home Instead Senior Care Headquarters, Phase II Omaha, Nebraska

Home Instead Senior Care, an international provider of non-medical care and companionship services for the elderly, has seen its employment double since 2004 and has outgrown its current location in the Bank of the West Business Park. To accommodate their growth, the company has chosen to build a new four-story, \$11 million headquarters across the street from their current facility, for which HBA also provided design.

Incorporating brick, pre-cast concrete, metal panels and curtain wall systems the building will be recognizable from multiple vantage points in the city. The building also provides for enclosed, conditioned executive parking, exterior verandas and upper story decks allowing for unsurpassed views of Omaha. Construction is scheduled for completion in August 2009. The current facility will be available for lease.
