

Mercy High School Omaha, Nebraska

In addition to providing master planning and programming services, Holland Basham Architects was retained by Mercy High School to design and provide full architectural services for the addition of an athletic facility and the renovation of the existing auditorium into a Fine Arts Center. A new athletic complex was built adjacent to the existing facility. It is situated such that it does not extend above the height of the existing building and it blends well with the scale of the neighborhood houses. It includes a 500-seat gymnasium, 94-foot basketball court, regulation volleyball courts, weight training room, locker rooms, training room and athletic offices that overlook the main playing court.
