

Midwest Gastrointestinal Associates Lakeside Endoscopy Center Omaha, Nebraska

To meet the growing demands of West Omaha, Alegent Health, along with 15 Omaha-based gastroenterologists, built a new 6,500 s.f., 2-room endoscopy procedure center in one of the medical office buildings near Lakeside Hospital. The center has 8 pre- and post-holding rooms centered around a nurse station which provides visual monitoring of all patients. The center also includes a physician work space and discharge/consultation spaces all organized to provide efficient work flow for patients and staff. The space is accented by decorative up-lighting and pendants and includes warm and inviting colors and finishes.

Adjacent to the endoscopy procedure center is also a new 2,575 s.f. clinic which includes exam rooms, a nurse work area and a physician office.
