

Mahoney State Park Peter Kiewit Lodge Ashland, Nebraska

HBA provided preliminary design for the addition of a 22,500 s.f., 520 seat conference center as well as the addition of 107 lodging units and associated parking. The project also includes provisions for a discovery trail that meanders through native grass and flowering prairies and features breathtaking lookout points and instruction/education platforms.

In addition, HBA provided design services for the expansion of the lodge's existing dining areas, kitchen support spaces and conference center areas. Operations were maintained within the existing kitchen and dining facility and the expansion was integrated within the existing architecture.

The second addition to the lodge included a new covered entry way, a relocated and expanded check-in counter and gift shop.
