

RiverStation Moline, Illinois

This 41,000 s.f. mixed-use building serves as the cornerstone for the Bass Street Landing Downtown Redevelopment Plan in Moline, Illinois. This center provides a combination of retail/restaurant space on the first floor, office space on the second floor and exclusive living units on the third floor with balconies providing views of the Mississippi River. In addition, Holland Basham Architects also provided interior design services for Bass Street Chop House (formerly Blue Ribbon Steakhouse) located on the ground floor.
