

Deere & Company Enterprise Support Facility Moline, Illinois

Deere and Company's Enterprise Support Facility is a 20,500 s.f., stand-alone facility with full off-site security monitoring, separate HVAC systems for operations, separate UPS room and battery rooms, and expansion capabilities of both raised floor and support areas with minimal disruption. The \$17 million facility can withstand winds of 125mph and has large structural bays (32'x40') to allow flexible equipment layout in raised floor areas. In addition to having over 9,500 s.f. of raised floor area, the facility is also equipped with a 2N electrical system and 75 watts per square foot.
